

# GM DC330mini Label Converter

**Single unit in-line or off-line  
converting for digital workflows**

As digital label printing continues to grow, label-printing houses are realising the need for all-inclusive digital printing systems that provide value-added features for producing fully finished labels. The DC-330mini from Grafisk Maskinfabrik (GM) offers the ideal solution. A complete converting and finishing unit, this product was specially created for use with digital printing presses.

The DC330mini can be set up as an in-line extension to a digital label printing system, allowing the web to continue directly into the converter from the digital press. It can also be used as an off-line converting and finishing unit for jobs from other digital presses or conventional presses. It can even function as a printing press for specialized value-added solutions.

- **All-in-one solution with many options**

The DC330mini has all you need to make labels. Varnish, die cut, slit & dual rewind as standard. Optional lamination, corona, web clean, back-scoring, razor slitting and more..

- **Precision cutting to reduce waste**

Print-to-cut registration in just one rotation no station; no station movement or mechanical setup required; semi and full-rotary die cutting

- **Speed and versatility**

Adjustable repeat lengths from 2" - 22.5"; line speeds up to 40 meters per minute

- **Varnish finishing options**

UV flexo varnish station with optional registration for spot varnish

- **Servo-driven web tension control**

Ensures accurate processing over a wide range of substrates

- **Compact footprint**

Measuring only 2x1 meters (6x3 feet) this compact design will fit into any shop.

- **Easy web access and maintenance**

Cantilevered design

The GM DC330mini integrates the most advanced converting and finishing techniques available today. When used together with a digital label press, this innovative unit gives professional label printers a complete and versatile solution for high-volume digital printing.
