

DC3-TUR

Semi-automatic turret for rewinding self-adhesive labels.

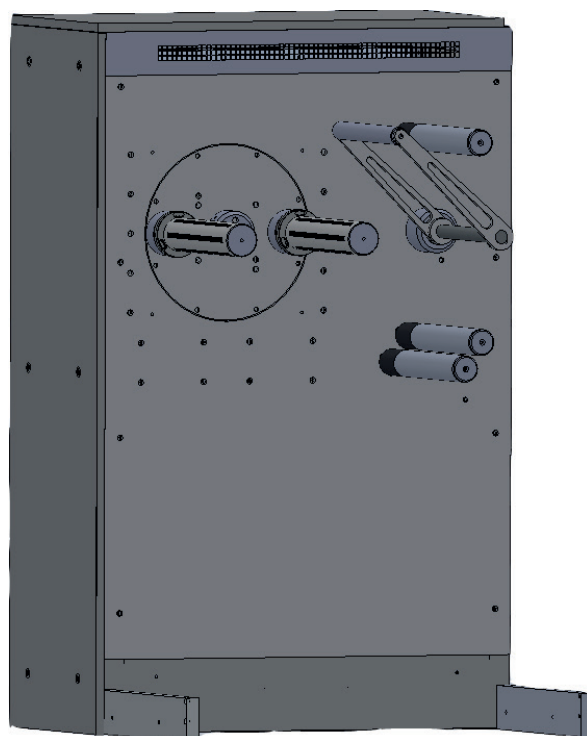

DESCRIPTION

Unlike conventional rewinding units, the semi-automatic GM Turret Rewinder is easy to prepare and set up. It is the ideal machine for long production runs with small roll sizes of rewinding standard self-adhesive labels.

The unit only halts for a few seconds while the turret indexes and new cores are applied while the unit is still running. This fast changeover keeps the time the operator spends changing cores at a minimum over time.

FEATURES

- Manual pneumatic spindle chucking
- Automatic arm movement of roll change
- Manual arm movement possible
- Two tension modes for low and high tension
- Optional: Adapter for different spindle sizes

SPECIFICATIONS	
Max transfer speed	Same as DC330 MINI
Max web width	330mm
Max roll diameter	450mm/200kg
Power Supply	Drawn from DC330 MINI
Compressed Air	Drawn from DC330 MINI
DIMENSIONS	
(LxWxH) [mm]	1020x1020x1660
Weight [kg]	500
